Portfolio

## Education:

Southern New Hampshire University / Bachelor of Science in Computer Science

## Skills:

| | | | | |
|---|---|---|---|---|
| C++ | HTML/CSS | Python | Git | Systems administration |
| Java | JavaScript | Debugging | Troubleshooting | Project management |

## Projects:

**Sudoku Puzzle Validator**  GitHub Repository
- This program runs on terminal and is written in python. It utilizes recursion to check whether or not the sudoku puzzle the user gave the computer has a valid solution.

**AI Tic-Tac-Toe**  GitHub Repository
- Terminal program written in python. It utilizes a minimax algorithm to ensure that the computer either always wins or ties against the user.

**Banking App**  GitHub Repository
- Terminal banking program written in C++. It offers users the options to create a new account, update their account balance, or view all bank accounts stored.

## Experience:

### Google IT Support Certificate  Certificate
- Gained competency in foundational IT support skills including troubleshooting and customer service, networking, operating systems, system administration, and security through practice-based assessments.

### Trident Maritime Systems/Venture Dynamics    11/21 – 04/22
